

Reverse osmosis systems

- » With high-performance membrane technology
- » High permeate yield of approx. 50%
- » Easy to install and operate through the app

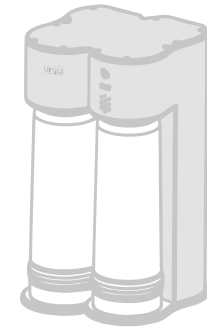

BWT bestaqua ROC

The Purists

- » Reverse osmosis system for all dishwashers, ovens, combination steamers, for steam generation and ice cube maker
- » Permeate performance 120 l/h or 180 l/h

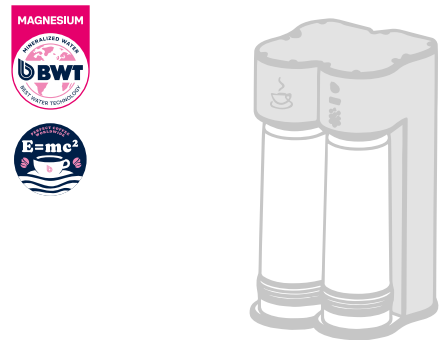

BWT bestaqua ROC ULTRA

Pure water duo

- » Reverse osmosis system for the ultimate demineralization of water for laboratories and medicine
- » Permeate performance 100 l/h

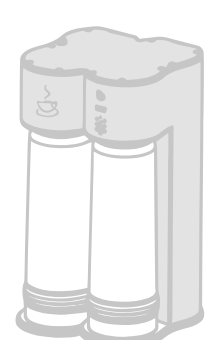

BWT bestbarista COFFEE ROC

The coffee master

- » Reverse osmosis system for making coffee regardless of local water hardness for globally standardized coffee water quality
- » Unique mineral mixture with a focus on magnesium and silicate
- » Permeate performance 120 l/h

BWT bestaqua COFFEE ROC

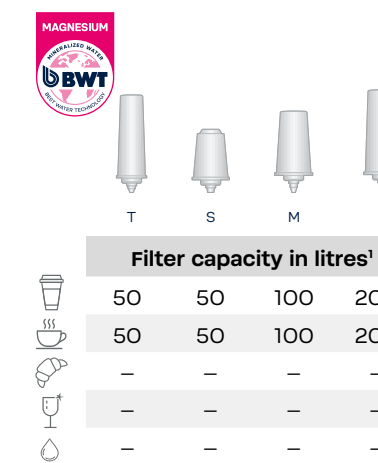

The remineralization duo

- » Reverse osmosis system for making coffee with the legendary BWT magnesium technology
- » Permeate performance 120l/h

Easy and efficient water optimization for Coffee machines with water tanks

	-	-	-	-
	-	-	-	-

The flexible

- » Reliable limescale protection with 4-level filtration
- » High filter capacities for maximum efficiency in the professional sector
- » Professional technology for perfect coffee every time and cost-effective limescale protection
- » Patented BWT magnesium technology
- » mineralizes the filtrate with magnesium as flavor carrier

¹typical capacity at 14° general hardness

BWT bestaroma PREMIUM

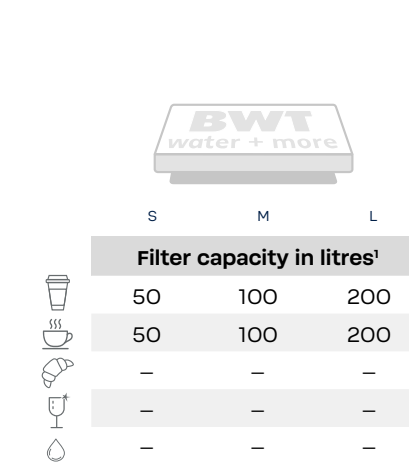

Filter capacity in litres ¹	145
	145

	-	-	-

The easy

- » Limescale protection pad for coffee machine water tanks
- » Easy and efficient to use
- » Minimizes limescale deposits in the machine

¹typical capacity at 10° carbonate hardness (alkalinity)

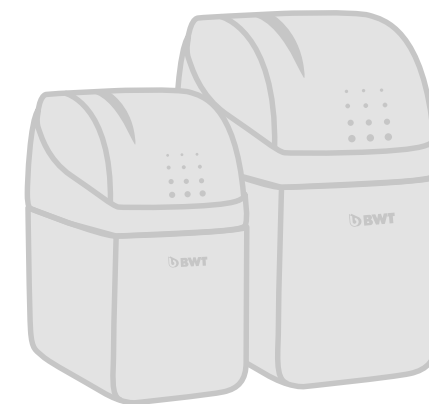

Water softening systems

Simplex soft water systems

BWT bestsoft

The softener

- » Ideal for directly supplying compact restaurant dishwashers for white crockery.
- » Fully-automatic and easy to operate
- » Automatic regeneration – quick, environmentally-friendly and economical
- » Water for brilliant glass, stain-free cutlery and immaculate porcelain.

BWT besthead FLEX filter head –

For all BWT water+more filter cartridges

- › Safely stopped bypass setting with easy-view display
- › Refined new connection technology for great flexibility when installing filters
- › With EASY Vent flushing valve for easy and reliable purging
- › DVGW-tested check valve on the inlet and outlet
- › Safe filter changes with no water leakage

- ☕ Vending with no steam generation
- ☕ Hot drink maker with steam generation
- ☕ Combined steamer/oven and ice cube maker
- ☕ Dishwashers
- ☕ Drinking water dispensers
- ☕ Steam generator medical, laboratory use
- ☕ Ice cube maker

The all-rounder

- › Filter system for ideal water in hospitality (HoReCa)
- › Reliably reduces Ca²⁺, Mg²⁺, particles, off-flavour elements and chlorine
- › Cost-effective limescale protection for all kinds of coffee machines
- › Balanced mineral relationship to guarantee the aroma and enjoyment
- › Perfect basis for high-quality brewed coffee and coffee specialities
- › Highly efficient and cost-effective
- › Universal for approx. 90% of all water situations

The taste experts

- › Filter system for premium water in hospitality (HoReCa) and vending
- › Patented BWT Magnesium Technology mineralizes the filtrate with magnesium as a taste enhancer
- › Limescale protection for machine technology and maximum water sensory quality
- › Perfect for hot drinks but also enjoyable cold and an ideal accompaniment for fine dining
- › Ideal to form a fine, stable crema on espressos

The protector

- › Filter system for water with protective factor in hospitality (HoReCa) and vending
- › Reliable and efficient reduction of general hardness, preventing limescale and gypsum deposits in raw water containing sulphur
- › Special pH value stabilization, minimizing the risk of corrosion
- › Comprehensive protection for machine technology
- › Filtrate with excellent sensory quality

The mineralizer

- › Filter system for premium water from raw water with low-salt content
- › Mineralizes the filtrate with magnesium as a flavor carrier
- › For use in areas with soft water and in reverse osmosis systems
- › Reduces off-flavour elements and chlorine
- › Perfect basis for brewed coffee and coffee specialities

The companion

- › Filter system for premium water in drinking water dispensers
- › Patented BWT Magnesium Technology mineralizes the filtrate with magnesium as a taste enhancer
- › Perfect for making fine cold drinks and an ideal accompaniment for food

The germ catcher

- › Filter system for drinking water dispenser
- › Carbon fibre membrane filtration retaining 99.9999% (log5/**log5) of bacteria, Legionnaire's and cysts
- › Reduces microplastics
- › Reduces foreign odours and flavours
- › Space-saving and very easy to use

* BWT bestcare S, bestcare Mini
** BWT bestcare 10

The enhancer

- › Filter system for coffee specialities and drinking water dispensers to reduce off-flavour elements
- › Hygienic protection thanks to silver-plated active carbon
- › Dependable reduction of particles and suspended substances
- › Reliable reduction of unwanted organic substances and chlorine
- › High sensory filtrate quality for a perfect taste experience

The dual protectors

- › Comprehensive protection for ice-making appliances
- › Constantly crystal-clear ice
- › Minimizes downtimes
- › Limescale stabilization with polyphosphate

The clarifier

- › Partial desalination for small hospitality dishwashers
- › Multi-level filtration to reduce limescale and other drying elements in the water
- › Minimizes the use of detergent
- › Stain- and smear-free crockery, glasses and cutlery
- › Less work for polishing glass and cutlery
- › Forms fine bubbles in sparkling wine and beer glasses

The desalinator

- › Full desalination for small hospitality dishwashers and sterilizers
- › Significantly reduces total salt content
- › No dried-on stains or smears
- › Minimizes the use of detergent
- › Brilliant crockery, glass and cutlery with no polishing
- › Forms fine bubbles in sparkling wine and beer glasses

The lab experts

- › Filter system for full desalination of drinking water for medical technology and in laboratories
- › Removes all dissolved salts from drinking water
- › Avoids salt deposits on sensitive lab equipment, such as steam generating equipment
