

Espresso machine Metos Classe 5 ECO S 2GR Compact

Metos Classe 5 ECO S 2GR Compact is an semi-automatic espresso machine equipped with an insulated boiler which prevents unintentional heat loss for an increased thermal performance and power efficiency, guarantees an energy saving of 15%. In the design of the Compact models, special attention has been paid to efficient use of space. The espresso machine with two coffee groups, two steam taps and a hot water tap is only 611 mm wide. The device is well suited for use in, for example, a small café, restaurant or hotel.

Clear buttons, semi-automatic dosing and manual cleaning, makes it easy to use. Black side panels, shiny stainless steel that dominates the front and clearly distinguishable steam tap levers give the machine a stylish look. It only takes three minutes to remove the body panels and cup tray to access the main internal parts.

Patented Steady Brew (SB) technology is the evolution of the traditional thermosiphon system and introduces a set of innovative features designed to improve the performance of all single-boiler espresso machines. By keeping the water temperature stable during extraction, Steady Brew guarantees excellent thermal stability, reliability and maximum repeatability, both during busy periods and in low usage conditions.

- two brewing units, two steam taps and a hot water tap
- possibility to use 80 mm tall drinking glasses and regular cups
- insulated ECO boiler size 5 liters
- separate gauges for boiler and pump pressures
- black ABS plastic side panels protect the machine from knocks
