

## Drop-in serving kettle Metos D-I 9 I

Dimensions:

A = flange

C = diameter

E = cut out

F = width innerpan over the handles

G = build in height

H = height above counter with innerpan and lid

J = build in height with drainkit (drainkit to be ordered separately)

 $y \times z = cut$  out operating panel

heating element 230V, 350W weight (empty): 7 kg

When constructing the counter, an opening for the connection cable must be considered.

The opening must be at least the size of a plug (diameter min. 40 mm). In addition, the edges of the opening must be finished to make sure that the connection cable is not damaged by rubbing against the opening edge.

The counter, where drop-in units are installed, must be damp-proof and strong enough to bear the appliance weight.

An example of mounting of the operating panel
